OUR WORK

We at Haritham Technologies have been delivering onshore/offshore outsourcing software development services for many years to global corporate, ranging from Fortune 500 to Internet start-ups primarily from the small and medium enterprise segment. Haritham offers a spectrum of application and consulting services that encompasses Web Application Development, Application Migration and Porting, Application Re-engineering and Enhancement, Auditing, Testing and Complete maintenance.

▶ Web Application Development

We create innovative web applications, helping organizations define and develop e-business strategies and provide a platform for deployment. We aim to deliver a low-risk, high-reward solution to all our customers. We help define the core competencies in a business and work side-by-side with our customers to exploit opportunities. By leveraging the existing IT infrastructure through web-enabling technologies, we give companies a quicker and economical time to market through their virtual presence.

We possess the proven experience of deploying and running secure dedicated software development center, likewise we deliver large and mission critical web applications. Few of our mission critical applications that are deployed and fully functional are listed below.

Few Of Our Web Application Works

Eu-Comm

Eu-Comm is a **Business Intelligence Application** which integrates the Suppliers and Retailers. It is based on Supplier Chain Management and has different access levels for Retailers and Client Back Office. This application has the facility to automatically update the data from the Retailer's POS systems and the Client Back Office's accounting system (SAGE) after mapping them to the database and managing the variance reports. The application has an extensive reporting facility and satisfies the Supplier and Retailer needs. There are various graphs and comparisons provided according to different user accesses to help improve the business.

Environment : ASP.NET 3.5, MS SQL 2008, MS Chart Controller, AJAX, JAVA Script

PRAJAYATNA (Document Management System)

This is a web application to maintain all school data for selected states in India. Prajayatna as the name reveals is a collective effort of citizens. It is the educational reform initiative of a Karnataka-based development organization to address the systematic causes of child labor.

Environment: PHP, My SQL

Risk Mitigation Report (RMR)

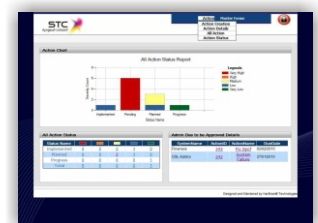

Quadrant Risk Mitigation report is a Business Intelligence Reporting Tool which stays on top of vast amount of information pouring into one of the leading telecom company in the Middle East. RMR, an enterprise dashboard solution is the perfect solution to organize raw data into understandable and interactive visual formats directly to user's computer across the internet. RMR is a customized web application that converts raw data into understandable, graphical formats, including attractive and customizable interactive charts, maps and graphs.

Environment : ASP.NET 3.5, MS SQL 2005, Dot Net Charting Tool, AJAX, JAVA Script

RMR Tracker

RMR Tracker is a **Compliance Tracing System** used for a wide range of industries. In a risk assessment and management scenario the risk officer can share the task of assigning a team member to each risk listed in the database. This way, team members can hold each other accountable for minimizing or monitoring threats (Risk Mitigation).

Environment : ASP.NET 3.5, MS SQL 2008, MS Chart Controller, AJAX, JAVA Script

Automated Strategic Business Reporting Tool

A Generic Intranet web application used for data mining and to report the efficacy and efficiency of multiple store performance and multiple campaigns by specific customer group of the client. The system automatically converts the reports in usable MS-PowerPoint presentation for the user group.

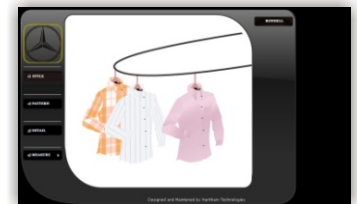

Environment – ASP.NET 3.5, MS SQL 2005, AJAX, JAVA Script

Online Tailor Storefront

A Web application that overcomes the contemporary online storefronts through its rich online user experience by ways of displaying 2D and 3D animation and at the same time allows users to design their own shirt models and save it in their respective online wardrobes. This system is an Online Shirt Designing tool that will be used to order customized shirts from the ready-made garment manufacturers.

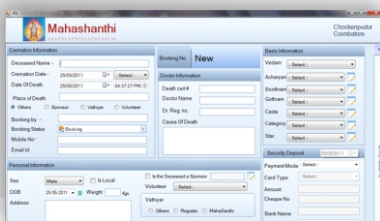

This tool will allow the users (customers) to design their shirts by choosing from various materials, patterns, styles combinations and selecting their preferred collars, arms, and cuffs design combinations.

The most significant feature is that the users will view the design changes and customization made to the product online graphically and then decide on finalizing the order. The system will also allow registered users to save their preferred designs and re-use later.

Environment : ASP.NET 3.5, MS SQL 2005, Silverlight 2.0, AJAX, JAVA Script

Mahasanthi (Cremation Application)

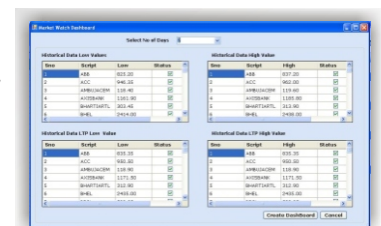

Cremation application provides booking of cremation through online. The latest technologies like automation by PLC, CCTV integration and systemized SMS alerts etc.

Environment: .NET 3.5, MS SQL 2005

Share Performance Indication Tool(SPIT)

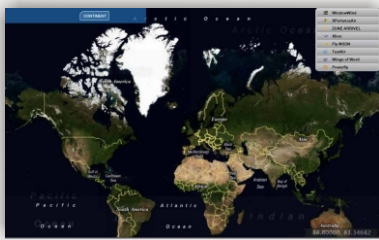

SPIT is an application build for a specific client to monitor the performance of the price fluctuation of shares using Online Streaming Data. Since the volume of data is huge and the constraint is to do multiple arithmetic and logical functions against continuously streaming data, a typical VSTO application is developed.

VSTO-Visual Studio Tools for Office are hybrid technologies of Microsoft that bridges office application and the programming tools and techniques.

Environments: VSTO with Dot Net Framework 3.5

Jettainer (Lufthansa AG)

The proposed system is an Online Monitoring tool that will be used by Jettainer to monitor the stock of empty “Containers” needed to transport luggage with in various airports. There has to be a minimum stock for each type of Jettainer at each airport.

JETTAINER is a company that manages the containers needed to transport luggage with in various airports. The Jettainer Monitor is a web application that is proposed to be developed as a showcase of latest technology using Microsoft SQL Server 2008 and .Net 3.5 along with MS Virtual Earth and AJAX based controls. The purpose of developing this system is to demonstrate the features of latest technologies from Microsoft especially to showcase new geo capabilities of SQL 2008 along with AJAX, .Net framework 3.5, MS VE Maps controls.

Environment : ASP.NET 3.5, MS SQL 2005, MS Silverlight 2.0, MS Virtual Earth, AJAX, JAVA Script

▶ Application Development And Consulting Services

Business Analysis And Technical Consultation

At Haritham Technologies, we follow a set of predefined steps to ensure that every solution that we develop and implement results in the desired ROI.

The various steps involved are:

- Understanding the client business model and business processes thoroughly
- System study and consolidation
- Development of system specification, refinement, and reviews
- Define the scope of the system, refinement, and reviews
- Application development and testing
- Application deployment and maintenance
- Documentation and Training
- Support and problem resolution
- Enhancement and Version releases
- Outstanding Customer Support Services

We ensure that at each and every stage we involve our customers. Every feedback and suggestions are incorporated in the system to deliver high quality customized solutions.

Legacy Applications Re- engineering

At Haritham Technologies, we believe that it is mandatory for our customers to keep in pace with the changes in their business environment. So, we nurture re-designing and re-engineering of legacy systems with the latest cutting edge Technologies.

In this way we assure adequate **% increase in the ROI** by increasing and improving the life of the IT investments, decrease service requirements and there by optimize costs.

▶ Few Of Our Application Development Works

Resource Planner

A Windows application that helps in organizing and planing regular and virtual classes, courses and their respective course calender ensuring total user friendly environment. The application is developed with a focus on usability by the real time end users of the application in the client

Environment : MS Visual Studio 2008, VB.Net, MS SQL 2005

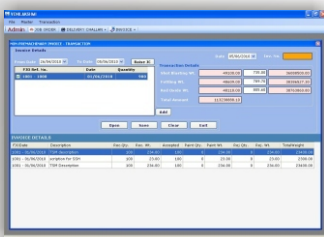

College Automated Allocator

Complete internal process automation for **DG Vaishnav college**. Reports generated through this application are designed in line with the Government norms and University norms laid down to the college for submission of certain critical information on periodical basis.

Environment : MS Visual Studio 2008, VB.Net, MS SQL 2005

IBS (Inventory Billing System)

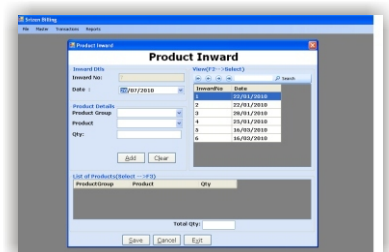

This is a windows application, which is developed for **Venilakshmi Engineers**. This project is about maintaining the sales transactions and associated Reporting. The application also handles Store Maintenance.

Environment: Dot Net Framework 3.5, MS Sqi 2005

Billing Software (Srizen)

▶ Custom Solution Development

At Haritham, we believe, research and innovation needs to be part of regular activities for sustenance and growth. Incidentally, Haritham had the opportunity to work closely with such a research based concepts through our German partner to develop Customized themes for MS Windows vista also called as Desktop Themes. In the process we designed and developed a fool proof Vista theme that give total relook of Vista variants with a theme of "Oktoberfest", which had a warm welcome during the "Oktoberfest" festival.

Who We Are ?

Haritham Technologies (Haritham) was founded by a team of experienced professionals with cross functional expertise and creative design consultants. The team has 60 years of cumulative domain expertise in the IT/ITES sector. Haritham started its operations in February 2003 with strong focus on quality and process improvement using Information and Communication Technology (ICT).

Haritham has been acting as an outsourcing delivery team for a few Information Technology/Information Security companies in India, UK, USA, Australia, Croatia, Germany, Spain, Middle East and Singapore. Based in the business hub of Coimbatore in Southern India, the Development Centre is able to attract the best talents in the Information Technology industry. To enhance the company's delivery model, Haritham is eyeing for a presence of a Disaster Recovery Centre in Bangalore / Chennai.

Haritham Technologies carries clear-cut processes, reusable frame works, professional wisdom and ready infrastructure. Our focus is on quality application development, in this process we continually educate and keep ourselves acquainted with the latest concepts, tools and technologies.

▶ Our History

Unlike many of the Start-up businesses in the industry, Haritham started its journey 7 years back as a computer hardware sales and services company apart from providing networking solutions to Small and Medium business houses in and around Coimbatore through it's sister organization "Haritham Associates". Slowly but steadily the Haritham management diversified itself into providing small scale IT/ITES solutions by exploiting its cumulative talents in this sector. Over a period of time Haritham established its exclusive Software Development and Consultancy wing by acquiring adequate exposure and expertise in providing **complex mission critical IT solutions**.

▶ Our Business Vision

Haritham Technologies aims to become the market leader and contribute to sustainable development through:

Sound Knowledge of technologies.

Market focus - Small and Middle Establishments (SME's), and Tier1 institutions.

Constant learning of technologies, latest concepts and business processes. We have the humility and hunger to learn.

Providing significant and quality results.

Expanding in new areas built on our technologies, competence and customer interests.

Maintaining highest standards of **Honesty, Integrity and Loyalty**.

Promoting and implementing creative and innovative ideas and solutions.

In simpler words **"TO BE THE BEST IN BUSINESS"**

▶ Our Values

Above all, we recognize that

- We are privileged to contribute to our customer growth and profitability
- We enjoy working hand in hand with our customers at every step
- We take responsibility for “QUALITY”
- We believe in adapting quickly to any kind of changes, because we know that “Change is constant”
- We ensure value addition to our customers, and
- We also believe in transparent communication

▶ Our Mission

Haritham Technologies excel in “**Technology and Beyond**”. We render valuable, efficient and effective service and support.

Our Mission is to provide:

1. End to End IT/ITES solutions.
2. Consultancy.
3. Design and Development.
4. Deployment.
5. Re-engineering of legacy application with latest technology.

Understanding the business process of our clients and providing solutions through state of art technology.

Our Services

Haritham is well versed to provide combo solutions that are critical while establishing mission critical strategies and concepts. Thus Software engineers of Haritham Technologies with their expertise in providing IT solutions in synergy with the expertise of Haritham Associates in providing Hardware and Networking solutions offer a spectrum of both consultancy and implementation services to the clients. Both the organizations augment each other to remain as an end to end service provider and remain as an extended department of clients' organization.

▶ Consultancy Services

▶ Onsite/Offshore Infrastructure Staffing Consultancy

Our on-site Staffing and off-site Out-Tasking project solutions are custom designed to each client's unique needs. IT staffing is an innovative staffing delivery system that utilizes best practices, vertical industry knowledge and real world experience.

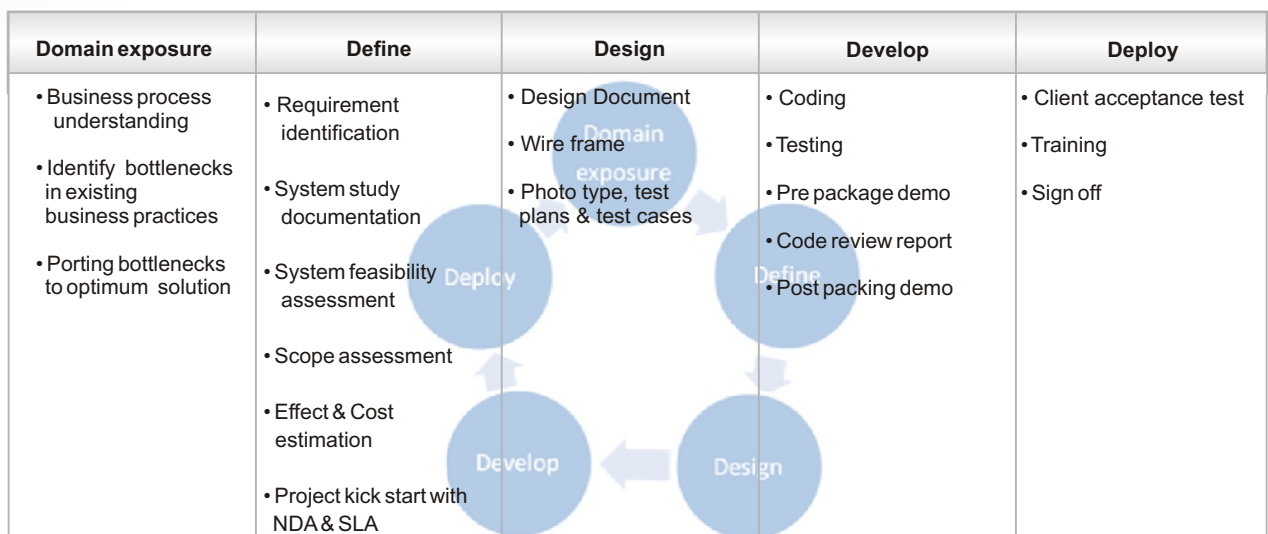

Out-Tasking is when your company receives defined services from a specialized provider (like HARITHAM) to support their IT information infrastructure.

- Reducing the internal and external HR costs
- Improving the company's service level and delivery
- Targeted IT recruiting, screening, hiring and training
- Directly supporting and augmenting your staff

Our Process

We have developed an innovative, flexible and personal approach to provide solutions to our customers. We treat each relationship uniquely and tailor our approach to understand our clients' business and then provide state of the art solutions to meet their business needs.

Haritham strongly believes with conviction that in order to ensure total customer satisfaction and retention, can only be achieved through Process Implementation in every step of execution, starting with requirement collection to project delivery and post delivery services. A clear perception of the growing requirement of the corporate world in the area of IT has enabled Haritham Technologies to develop programs of specific relevance for the present and the future. A glimpse of our working model is given below:

Philosophy

Haritham Technologies believes in nurturing knowledge transfer to the younger generation and there by imparts IT/ITES related education cum training through its Independent Unit "Haritham Edu-care".

What we practice?	How we practice?
➡ Create a win/win situation for all the customers	➡ Focus on Quality, long-term benefits
➡ Leadership by example	➡ Market it, not product out
➡ Self discipline	➡ Be customer oriented
➡ Participation by all	➡ Work with facts and data
➡ Continuing education for all	➡ Act on causes, not just phenomena
	➡ Be process oriented
	➡ Prioritize

▶ Security And Adaptability

As a focused technology corporation, we deliver solutions that are fully secured and scalable to accommodate business process change and growth. For enhanced reliability of the solutions, we assure both Information and Solution level security.

▶ Quality

We are committed in providing quality solutions that are reliable, smart and result in customer satisfaction. At Haritham we nurture a culture of continuous learning, enabling the staff to achieve personal excellence and to take pride in their deliverables.

▶ Corporate Social Responsibility

We provide technology assistance at non-corporate rates to educational, social, non-profit and charitable organizations. Amongst the organizations that have benefited from this CSR initiative are trusts providing services in HIV/AIDS treatment and prevention, and another that strives to empower the poor with education.

▶ People And Infrastructure

Coimbatore Development Centre has a current seating capacity of 60 having expertise across verticals. Network Infrastructure with secured access and a 1 Mbps internet line with back-up of 3Mbps as a contingency measure and a cluster Development, test and Production Servers. Currently the facility is staffed with a strong technical team having expertise in both Microsoft and Open Source technologies.

Partnership

▶ Benefit for Alliance Partners

Out Sourcing Partnership

At Haritham Technologies we remain as an extended arm of our global partners / associates by remaining as their outlets in India ensuring a Win-Win situation. Thus, we look forward to provide our qualitative and quantitative services to our partners in both Consultancy and development arena. Some of our partners include

- **Seabrook** is European companies who have join hands with Haritham Technologies to market our solutions in Ireland.
- **Pfau Handelsgesellschaft, Germany**, is European Marketing partners of Haritham Technologies based at Munich, Germany.
- **Informare Consulting GmbH, Germany (Microsoft Gold Certified Partners)** is Technology Partners and WCF. of Haritham Technologies for high end latest technologies of Microsoft such as Silverlight, Virtual Earth
